12. [] Spoke with Miss Lynch, in the office of Representative Henry Reuss (D., Wis.), and advised her that while we couldn't object to [] plans to travel to Bloc countries the trip would not facilitate and may in fact delay the processing of his application, but that this was conjecture. Miss Lynch appeared to appreciate that normally this was the type of question one would expect to hear directly rather than through a congressional office. Miss Lynch explained that he hadn't raised the question but had merely notified their office that he had made application to the Agency and of his travel plans and they had called us thinking it might delay security processing. Miss Lynch thanked us for our response and we will be receiving a congressional inquiry on the status of [] application. STAT

13. [] Received a call from George Murphy, Joint Committee on Atomic Energy staff, concerning whether the Director planned to use a statement during his appearance tomorrow and if so Murphy wanted at least one copy of the statement immediately and assurance that they would have a copy for each member in attendance at the hearing. This was passed on to Mr. Warner and [] for handling.

STAT
14. [] Accompanied [] to the Joint Committee on Atomic Energy hearing room so that he might familiarize himself with the physical layout in preparation for tomorrow's briefing. Mr. Conway and Mr. Murphy, of the Committee staff, arrived while we were there and raised a question about our compliance with the Committee's 24-hour rule with respect to the provision of an advanced copy of the Director's prepared statement. We advised them that in view of Senator Jackson's desire to have information on the Moscow parade included in the statement and the fact that several other items were still being coordinated, the paper would not be ready until 8:30 tomorrow morning. ✓ STAT
